

Pixel Voice Technology

VoIP Rate Sheet

Reliable voice pricing for SIP, Cloud PBX and high-volume call environments

Starter Voice R0.35/min Single SIP / lighter use	Growth Voice R0.25/min 10+ users / PBX teams	Cloud PBX R80/extension Enterprise-grade features
--	--	---

Rates below reflect Pixel Voice's current commercial model. Custom pricing may apply based on destination mix, routing requirements, monthly usage and overall traffic profile.

South African Voice Pricing

Plan	Rate	Best suited for
Starter	R0.35 / min	Single SIP trunk, direct IP-phone or softphone registration, or a lightly used PBX environment.
Growth	R0.25 / min	Teams of approximately 10+ users using their own PBX or Pixel Voice Cloud PBX, with regular business voice traffic.
Custom	Volume based	High-volume call centres, resellers, international campaigns and larger traffic profiles requiring tailored routing or commercial terms.

Voice usage is billed per second. International and country-specific outbound routes are available on request.

South African DID Pricing

Item	Price	Notes
Local South African DID	R50 / month	Local geographic DIDs available across South African provinces. Suitable for SIP, Cloud PBX and campaign use.

Channel Capacity Pricing

Channel packages determine how many simultaneous calls your SIP environment can support. Choose the capacity that matches your users, PBX or outbound calling workload.

Channels	Monthly Price	Best For
10	R100 / month	Smaller SIP or PBX environments
20	R126 / month	Growing teams needing additional concurrency
50	R191 / month	Busier operations and outbound floors
100+	From R321 / month	Larger environments and custom deployment planning

Cloud PBX & Business Voice

If you prefer Pixel Voice to provide and host the PBX platform as well, our Cloud PBX is available per extension with enterprise-grade business telephony features.

Item	Price	Included
Pixel Voice Cloud PBX Extension	R80 / extension / month	Enterprise-grade hosted PBX features including extensions, IVR, ring groups, call queues, voicemail, time conditions, call recording, CDRs and business call routing.

Custom & Volume-Based Pricing

For higher monthly traffic, resellers, call centres, country-specific routes or special routing requirements, Pixel Voice can tailor the commercial structure to your operation.

- Volume-based pricing for larger monthly usage
- Better pricing potential as usage and scale increase
- Custom routing and destination-specific requirements
- International routes available on request
